III

# A. military Installations and Augreers

## L. MOLUNAT

In April 1949 the following juns were emplaced at the edge of the steep cliff Jouthoust of MULUMAT pointing seaward:

a. Three guns of 150 mm callbar, Czech make "Skodo")guns in

One anticircraft battery of 33 mm callbar, dition

German make )and ready
for action.

One battery of 75 nm caliber, Italian make Four amticircraft juns of 20 nm caliber

b. One coast battery was said to have been previously located there.

c. Ammunition storage facilities were located about 1,000 feet east of each battery. (Source B).

25X1

25X1A

## 2. PREVLIKA-OSTRA Penincula

Several batteries were emplaced on the peninsull, located more closely together towards OSTAL. The batteries pointed towards the sea and the entrance of the bay. Some were emplaced in old Austrian fortifications.

a. Ten howitzers of about 150 mm caliber (Soviet make, muzzle brake, rubber-tired wheels) were emplaced there. The howitzers were, on their arrival, seen from a close distance by source A.

b. One bettery of 150 mm caliber, Gzech make "Stoda", two four-barreled machine guns (apparently light anti-aircraft guns), four antiaircraft guns of 20 mm caliber, and four large searchlights were emplaced in the area of OSTRA in September 1947. The construction of the positions had just begun at the time of observation (Source B).

c. A neval observation post was located on the tip of the peninsula (source B).

## 3. Kumbok (populations about 4,000)

a. I land-based torpede launching site; concrete jetty of about 230 feet with a command tower-like structure; equipped with four torpede tubes at the head. The traverse of the tubes was limited. One narrow-gauge and truck lead to the torpede storage depot (Source A).

b. Haval coast artillery barracks: north of the coastal road in SACK, area of 2,600 by 800 feet, five large multiple-story brick buildings, occupied by 1,000 to 1,500 troops; permanent barracks of the troops manning the coast batteries at the entrance of the bay. These troops were allegedly relieved every other month (Source A). The barracks was also referred to as artillery school. (Source H).

- 4. A restricted navy zone was near a destroyed village on the hills east of Orahovac, about 2,700 feet—above sea level and about 2.5 miles east of the coast. The buildings seen there allegedly belong to an ultrashort wave station according to Yugoslavs (Source A).
- 5. KOTOR
  The following military installations were observed in KOTOR:
  - a. Maval school on the northern town border (Course F).
  - b. One small arsunal south of the courtal promenade but on the eastern shore of the bay. Three medium submarines were stationed there until mid-December 1948. Since December 1948 only one submarine has been seen there (Source
  - c. Barracks and training grounds southcast of the towns one self-propelled artillery battalion with motor vehicle repair shop and a small fuel dump were located there. The battalion was equipped with self-propelled guns of Italian and German make, which, however, had many technical deficiencies. Proops of the 1926 thru 1928 classes were observed. Fourhundred recruits arrived in December 1948. (Source G).

6. KLINCI

25X1

Naval radio station with two high iron masts. a German transmitter station had been located in the area of the old fortress during the war (Source 1). course o reported this installation to be part of the TIVAT naval radio station.

- 7. There was an old fortess at the castern side of the entrance to the bay, southwest of ZaLamili and northeast of Jap LUSTICA. It was occupied by naval coast artillery troops from KULBOR (Source A) (see paragraph 8)
- 8. The following guns were emplaced 1 mile southwest of ELINCI until teptimber 1947 (probably on the GOWILA Hills):
  - One gun of 150 mm caliber, Jzech "Skoda".

Eight juns of 105 mm caliber, Italian make.

Four June of 75 am caliber, Italian "Breda", probably former ship-based guns.

One antitank gun of 75 mm caliber, German make.

Three antiaircraft june of 37 mm caliber, German make.

Three antiaircraft guns or 20 am caliber, German make (Jource B).

- b. Ammunition tunnels with ammunition of different types were located on the northern slope of the Jomila Hills (Source 3).
- 9. There was an insular fortress at the entrance to the bay (probably MANULA). This is an old Austrian for tiffcation. One antisircraft battery of 38-mm guns and one searchlight battery were stationed there and manned by troops from the naval coast artillery barracks in KULBOR (Source A).

### 10. ZANJICA

The following guns were emplaced (well camouflaged) on the slopes around the town:

One four-barroled antiaircraft gun of 20 mm caliber, German nake.

Four antidircraft guns of 20 ma caliber, German make.

four antiaircraft guns of 57 ma callber, German make.

### 11. ARZA

Pointing towards the bay, one battery of 150-ma guns (Czech "Ckoda"), one 83-mm antiaircraft gun (German make) and two four-barreled 20-ma antiaircraft guns (German make) were emplaced. Limition niches were built into the mountain behind each jun position (source B).

#### 12. TRIOTE

It the tip of the peninsula there were four 75-mg guns (Italian make "Breda") and four 20-mm antiaircraft guns (Gorman make). The positions were being improved (Source B).

## Supply Installations and soreshops

147. Zibilia (population: 3,000), capacity of the marbors ships up to 10,000 gross registered tons; terminal station of a narrow-gauge ruthroad line from works and Islumbes large transloading point (Source A).

b. Installations observed: Eaval supply depot for rations and clothing (Source A), amaunition, guns, military goods (Source D); storage place of the HIVAT naval arsenal (Source A). She cars loaded with submarine mines (Soviet make) arrived every lay from October 1947 to February 1948 and were either transloaded on thips at night or stored in the depot (source B).

- 15. At MOdIMJ, about 300 feet west of the town, there were six ammunition tunnels (65 x 32 x 15 feet) built into the slope of the countain. Infantry, urtillery and antiaircraft ammunition was stored thore (source B).
- 16. LIPCI (population: About 200)

a. Three above ground oil tanks with a total capacity of about 60 cubic maters (for the navy) (Source A).

b. Six fuel tanks each about 50 feet high and 26 feet in diameter, were built into the slope of the mountain southwest of the town, canouflaged by clive and palm trees. The tanks were filled with gasoline and lissel fuel and connected by piping with another fuel depot south of the town. The latter depot consisted of tarco fuel tanks, each 26 feet high and 33 feet in diameter. The fuel tanks were located close to the beach and were not camouflaged. They were filled from ships with Jasoline and Diesel fuel (Source B).

### 17. PLASE

Five civilian houses at the stone pler were being used by the navy as storage for clothing, tailors shop and shoemakers' shop (Source A).

- 18. Ammunition bunkers were located about half-way between MUO and PRIANJ (probably near GLAVATI) on the coastal road; the bunkers (100 x 32 x 16 feet each) were filled with infantry, ertillery and anticircraft ammunition (source B).
- 19. LEFETANE (population: about 500), amunition factory with a loading pier of about 50 feet length, buildings about 200 x 200 feet, ten cantonment buildings with roofs of corrugated showt motal (each 100 x 32 feet). According to source B and C amunition dumps and an ordnance repair shop were also apparently located there (source J).

#### OVOTATO OS

An ammunition dump with ten brick-buildings, 130 imes 25 imes 16 feet each. A narrow-gauge truck connected the dump with the harbor. Palm, olive and fig trees grew there. Infantry, artillery and anticircraft ammunition was stored in the dump. Tunnels were built into the slope of the mountain for the storage of additional amunition. On the road from LALTYA to VJCC BADO, about 0.5 miles north of LASTVA, there was another dump for amounttion and infantry weepons (source B).

Suddentille

25X1A

### 21. <u>Valle</u> (hill 768)

An ammunition dump 3,250 x 330 feet, was located in the woods at kilometer stone No. 12 of the new passwood TIVAL-VALAG-KOTOR. The dump had the following buildings:

a. One stone building, 330 x 130 x 50 feet filled with light and heavy howitzer amounttion,

b. Four brick buildings,  $100 \times 26 \times 13$  feet each filled with infantry administrans

c. One stone building, 330 x 130 x 32 fect filled with artillery and antiaircraft camunition.

### 22. PRISTAN

A cantonment of six wooden buildings was located 0.5 to 1 mile west of PRISTAN. Submarine mines have been stored there since August 1947 (Source B). According to source D, large buildings filled with large quantities of mines were in the same area.

23 a. The sources expressly stated that no military installations were located in the following towns:

ERCEGNOVI, BISLA, RISAN, XRYOLL.

b. KRTOLI is not entered on maps in the scales of l:100,000 and l:750,000. KRTOLI is the new name of several villages merged into one town.

- C. TIVAT, Maval Port
- 24. For military installations in TIVAT sec Annex 1.
- 25. Noval orsenal: Built in 1904, enlarged and modernized from 1944 to 1948.
  - a. For lotalls see Annex 2.
  - b. Personnel:

    Jork force: 800 to 2,000 civilians and 50 to 200 PJs

    (as specialists) (source A).

(as specialists) (source 4).

## C. Repair York and Productions

- l. Motorboats, yachts, naval vessels up to the size of torpedo boats (Source A). Freighter up to 2,000 gross registered tons, tankers, gunboats, towed boats, assoult boats, and rowboats (Source C); spare parts for ships, screw propellors of steel and brass of 2 to 3.2 feet in diameter, parts for the TITOGAAD plant and machine tools, casings for egg-shuped hand grenades (Source J).
- 2. Darrels have been produced there for some time (source H).
- 3. Source I gave the following supplementary information: Size of the workshop area is about 14 acres. Dry dock excevation (see Annex 2) about 10 acres. Foundry, 60 feet high, 2 furnaces, 5 small "Bessemer" bulbs, boilershop, 60 feet high, iron-brick building with:
  - l big joiner's bench for iron plates
  - 3 big boring machines
  - 3 big punching machines
  - l slicing lathe
  - 5 small ancet metal rollurs, 5 feet wide
  - 3 electric welding sets
  - 2 autogenous welding sets
  - 2 large surface plates, 13 x 19 feet
  - l (travellin; crane) 25 tons

Ship's boiler 13 to 32 feet long, 5 to 12 feet in diameter, were manufactured.

Turning shap with about 30 machines; 32 feet high Joiner's shop, about 40 circular saws, band saws and joiner's benches; 26 feet high.

#### 26. Comment:

In general the information is considered credible, mainly because the essential statements were confirmed by other sources. New information to compare the statements is not available.

2 Annexes: L. Allitary Installations in TIVAT, Yugoslavia.
2. Naval Arsenal in TIVAT, Yugoslavia.
